

Dr. Barış Yetiş Yıldırım

SPECIALIST IN IMPLANTOLOGY, ORAL AND MAXILLOFACIAL SURGERY SPECIALIST

Dr. Barış Yetiş Yıldırım is a specialist in Oral and Maxillofacial Surgery with over a decade of clinical experience, dedicated to helping patients restore both function and confidence through advanced dental implantology. After graduating from Hacettepe University, Faculty of Dentistry in 2015, he completed his specialist training in Oral and Maxillofacial Surgery at Marmara University (2018–2023), where he focused on complex surgical techniques and implant-based rehabilitation.

Today, as part of the surgical team at Aksu Clinic Dental Art in Istanbul (since December 2024), Dr. Barış provides care to patients from all over the world who seek reliable and modern solutions. His expertise covers the full spectrum of implant treatments , from single-tooth implants to comprehensive full-arch restorations such as All-on-4, All-on-6, and zygomatic implant protocols for cases with severe bone loss. He is also skilled in bone augmentation and sinus lift procedures, ensuring stable foundations for long-term success.

Dr. Barış combines surgical precision with the latest digital planning and guided surgery technologies, creating treatment outcomes that are not only functional but also highly aesthetic. He is experienced with zirconium implant systems, providing patients with biocompatible, metal-free options that meet the highest standards of modern dentistry.

Recognized for his patient-focused approach, he believes that every case must be guided by honesty, preparation, and medical responsibility. By continuously participating in international congresses and advanced training programs, he ensures that the patients at Aksu Clinic benefit from the most innovative, evidence-based, and safe techniques in oral surgery and implantology.

Professional Experience

ORAL IMPLANTOLOGY, ORAL AND MAXILLOFACIAL SURGEON
Aksu Clinic Dental Art, Istanbul

Istanbul, Turkey | December 2024 – Present

- As an Oral and Maxillofacial Surgeon at Aksu Clinic Dental Art, where he combines surgical expertise with a strong commitment to ethical, patient-focused care. His guiding principle is that every procedure must not only restore function and aesthetics but also ensure the long-term health and safety of the patient.
- Dental implants are the cornerstone of his expertise. He carries out treatments ranging from single-tooth implants to highly complex full-arch restorations such as All-on-4 and All-on-6 protocols. He is also a recognized expert in zygomatic implantology, offering life-changing solutions for patients with severe maxillary bone loss who are not candidates for conventional implants.
- By combining surgical mastery with Aksu Clinic's boutique approach to international patient care, Dr. Barış ensures that patients from around the world receive not just implants, but comprehensive, advanced oral rehabilitation. Through his continuous participation in international congresses and advanced training, he keeps Aksu Clinic at the forefront of innovation in implantology and complex oral surgery.

Oral Implantology, Oral and Maxillofacial Surgeon
Motif Oral and Dental Health Polyclinic

ISTANBUL | 2021 – 2024

- Specialized further in complex surgical implantology, including full-arch rehabilitation protocols. During this period, he refined his expertise in digital surgical planning and immediate loading techniques, keeping pace with innovations in implantology.

ORAL SURGEON IMPLANTOLOGIST SPECIALIST
Fatih Oral and Dental Health Polyclinic

Istanbul | 2019 – 2021

- Continued his professional growth in a large, urban dental center, handling a higher volume of surgical cases. Gained deeper experience in implant-based rehabilitation and performing advanced procedures such as sinus lift surgeries, bone auıgmentation procedures

Professional Experience

GENERAL DENTIST AND ORAL SURGEON
AVA Oral and Dental Health Polyclinic
DÜZCE | 2018 – 2019

- Expanded his surgical scope, focusing more on implantology, bone grafting procedures, and treating complex cases. Developed a strong patient base and improved his interdisciplinary teamwork with prosthodontists.

GENERAL DENTIST AND ORAL SURGEON
Dünya Oral and Dental Health Polyclinic
Düzce | 2016 – 2018

- Started working as an oral surgeon after completing his basic training, performing surgical extractions, implant placements, and minor oral surgeries. Built strong skills in clinical diagnosis and surgical decision-making.

GENERAL DENTIST
Celal Bayrakçı Clinic , Joint Dental Practice
Turkey | 2015-2016

- Began his clinical career as a general dentist, gaining solid experience in preventive and restorative dentistry, patient care, and the management of routine oral health treatments. This period provided the foundation for his later specialization in oral and maxillofacial surgery.
